

# AI Powered Legal Workflow Automation

No coding hurdles - No IT complexity  
Effective results in minutes  
Ready for scalability

## AI Agents

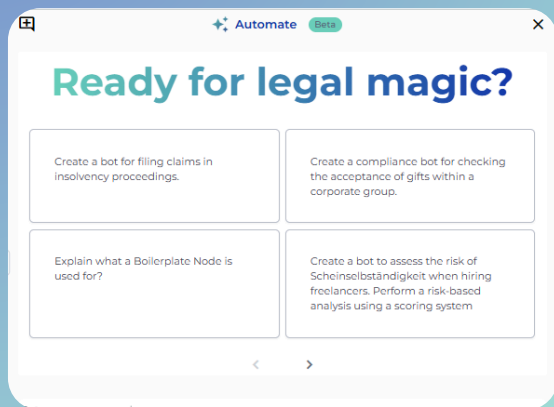

Configure AI agents using your standard settings and a controlled knowledge base.

## AutoMate 2.0

Turn chat with AI into your legal automations. Describe, Refine, AutoMate!

Create legal automations by chatting with **AutoMate**. Describe your workflow, refine it with your expertise and the help of AI, and launch scalable, rule-based AI-powered workflows in minutes.

## API Node

Integrate seamlessly with public services like Google or your existing tools like HighQ, DocuSign, etc.

## Clause Manager

Centralize standard clause drafting to ensure consistency company-wide.

## Your LLM of choice

Flexibly choose different LLMs depending on your automation's use case.

## Tool Deployment

Build automations once, share with clients or easily embed on your site to scale.

"As a rapidly scaling business, we see numerous automation opportunities on our growth roadmap. For us, speed, flexibility, and usability are essential and Lexemo's e! delivers all of them. Our first step: automating the KYC process, made simple and ready to go in no time!"
